

Reviso d.o.o. opts for the following policy:

Focus on the customer needs and expectations, delivery speed and completeness, are the most important values which measure and determine the overall performance in the field of production.

To achieve, maintain and strengthen these values:

- we monitor trends in the production of wet wipes and effectively apply them during the development and production of products that meet all applicable regulatory and customer requirements in terms of quality, safety and health; in order to achieve all of the above, specifications with clear requirements for each product are documented and procedures are established according to which manufactured products are equipped, controlled and placed on the market
- we maintain an effective system of monitoring, evaluation, communication and implementation of legislative changes
- we achieve production at the highest technological standards
- we employ staff who will have opportunities and obligations to constantly develop and improve
- we nurture and develop partnerships with suppliers
- we implement solutions that fully support the requirements and needs of customers
- we strive for balanced, long-term and profitable growth in line with the vision of sustainable development
- we apply and improve the effectiveness of the product quality management system and safety based on the requirements of ISO 9001: 2015, ISO 22716: 2007 Cosmetics - good manufacturing practice and IFS HPC and we strive to exceed the level of these requirements
- we set ambitious, measurable and achievable goals for product quality and safety
- we carry out production and other business processes in a way that complies with all legislative requirements regarding environmental protection and continuous reduction of negative impacts on the environment
- we respect all legislative requirements for safety at work and continuously develop a safe and appropriate working environment for our employees, as well as all visitors
- in order to ensure required safe working environment and products quality and safety, we implement effective programs of regular maintenance, monitoring and cleaning of plants, premises and equipment
- we regularly monitor our products quality and safety management system in order to identify in a timely manner all opportunities for improvement wherever necessary
